

## Personal Information Manager ( with DB )

### Assignment

#### PIM - Personal Information Manager ( with DB )

The PIM with DB assignment is a full-blown Personal Information Manager with same general idea (todos, appointments, etc.) stored in database accessed by JDBC.

**JDBC (following JDBC topic):** you need to be able to save a list of items to a database (and to read from a database). You can use whatever you want to design with a database.

### How to submit

Submission of your homework is via huaweicloud Classroom and the general idea is to upload your files as attachments. For this Homework you should submit your .java files (remain your src directories) with a readme description inside very beginning of block comment.

The name of attachment (zip or rar file) of your message should include your **student#\_HW#\_fullname**. Anything else you want to tell us should be included in a **readme.txt** file. Make sure your submission includes your full name, student No and Email address in every single source file, we can't record your grade unless we know your name or student No.

**Don't submit compiled code (class files)!**

**Multiple Submissions:** You can resubmit for each project following the huawei Classroom instructions, we will always grade the last submission received.
